

BACHMANN TRAINS

2013

Now that's the way to run a railroad!™

Traintastic Chuggington™ is pulling into Bachmann! Based on the popular TV series Chuggington™ that airs weekdays on Disney Channel's Disney Junior programming block for kids and their families, and daily on the new 24-hour Disney Junior basic cable and satellite channel, HO Scale Chuggington electric Locomotives, Rolling Stock, and Accessories are arriving in 2013! Join your favorite "trainees" —Brewster, Wilson, and Koko— as they ride the rails pulling Chuggington cars that include a Box Car, Low-Sided Gondola, Flat Car, two Hopper Cars, and a Passenger Car. Vee, the depot dispatcher, will be there to keep all the Chuggers on schedule.

As Bachmann proudly celebrates its 180th anniversary this year, we continue our tradition of excellence by adding models to our hit line of HO DCC sound-equipped Sound Value locomotives. There are five new ones for 2013—the Alco S2, F7-A, F7-B, RS-3, and EMD DD40AX —that all include our Sound Value *SoundTraxx*® diesel sound package. These diesels are also available in DCC-ready versions.

This year, *Thomas & Friends*™ fans can look forward to *Iron 'Arry*, *Iron Bert*, *Jeremy*, and *Troublesome Truck #4* as well as the new *Thomas' Christmas Express* set in HO scale and *Toby the Tram Engine* and new rolling stock in Large Scale.

The Alco 2-6-0 is now available in an N scale DCC-equipped model. Also joining our line of N scale locomotives with DCC ON BOARD™ is the S4 Diesel. Complete your N scale train with the new 50' Sliding Door Box Car, ACF 50' Steel Reefer, and Three-Dome Tank Car, all with magnetically operated *E-Z Mate*® Mark II couplers.

2013 also marks 25 years of our Large Scale Big Haulers®. Since arriving in a big way in 1987, our Big Haulers® line has continued to grow in popularity. This is the perfect time to introduce our new line of "Li'l" Big Haulers®. Featuring a compact size and fanciful designs, Bachmann's Li'l Big Haulers® are the perfect way to start Large Scale model railroading. You can choose from three different ready-to-run electric train sets: *Fast Freight*, *Short Line Special*, and *North Pole Express*. There's also a full selection of colorful separate-sale Li'l Big Haulers® locomotives with tenders, tank engines, hoppers, tankers, coaches, baggage cars, and cabooses.

New in *Spectrum*® is the Sound-Ready DCC-equipped On30 2-4-4-2 Locomotive. You can easily add 16-bit Tsunami® *SoundTraxx*® sound to this engine with the purchase of the companion 2-4-4-2 *Plug-and-Play Sound Module*. And the super-detailed 1:20.3 C-19 brings the latest advances in model engineering to our Large Scale *Spectrum*® line. From the adventures of Chuggington to the amazing C-19, this catalog has something for every level of model railroading. Now that's the way to run a railroad!

Civil War-Union

an E-Z Track® set with E-Z Mate® couplers

Item No. 00708 • Suggested price: \$275.00

With the shots fired at Fort Sumter on April 12, 1861, the War Between the States officially began over 150 years ago. From the start of the Civil War, the Union recognized the advantages offered by railroads and was quick to employ the "iron horses" for the first time in a military campaign. With the formation of the United States Military Railroads (USMRR), the Federals gained the authority to take possession of whatever equipment was necessary to operate strategic rail lines in support of the Union Army. Backed by the government and managed by the leading railroad men of the time, a well-equipped USMRR train was commonly powered by a 4-4-0 locomotive pulling a box car, flat car, water tank car, and gondola. A trailing combine often served as a guard car to ward off Confederate attacks. Our *Commemorative 150th Anniversary Edition Civil War - Union* set marks this turning point in our nation's history and comes complete with:

- 4-4-0 American locomotive with operating headlight and tender
- USMRR water car
- USMRR box car
- USMRR gondola
- USMRR flat car
- USMRR combine
- 100-piece set of Civil War military figures (blue)

- 56" x 38" oval of E-Z Track® including 12 pieces of curved track, 3 pieces of straight track, and 1 plug-in terminal rerailer

- 4 horses

Civil War-Confederate

an E-Z Track® set with E-Z Mate® couplers

Item No. 00709 • Suggested price: \$275.00

With the shots fired at Fort Sumter on April 12, 1861, the War Between the States officially began over 150 years ago. Railroadng would play a key role in the Civil War, providing logistical support and carrying munitions, supplies, and troops to each side's respective armies in the field. Lacking the financial power and the more standardized rail system of their Northern counterparts, Southern-held railroads relied heavily on the ingenuity of their railroad men to support the troops. A typical Confederate consist featured an assortment of commandeered rolling stock bearing the names of a variety of Southern railroads, which is reflected in this model. Our *Commemorative 150th Anniversary Edition Civil War - Confederate* set marks this turning point in our nation's history and comes complete with:

- 4-4-0 American locomotive with operating headlight and tender
- water car (Manassas Gap)
- box car (Savannah, Albany & Gulf)
- gondola (Fredericksburg & Potomac)

- flat car (Mississippi Central & Louisiana)
- bobber caboose (Atlanta & West Point)
- 100-piece set of Civil War military figures (gray)

Plasticville® U.S.A.

HO SCALE PLASTICVILLE® U.S.A. BUILT-UPS

Suggested prices shown.

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. Now, in addition to our traditional, easy-to-assemble kits, Bachmann is pleased to offer these pre-assembled *Plasticville® U.S.A.* buildings.

Plasticville® pieces add character and dimension to your HO scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

Magnetically Operated Knuckle Couplers

E-Z Mate® couplers make use of precision molding techniques to allow the molding of springs as an integral part of the knuckle coupler; *E-Z Mate®* Mark II couplers include an integrated metal coil spring. *E-Z Mate®* and *E-Z Mate®* Mark II couplers eliminate the problems and expense associated with separate coil springs.

To install *E-Z Mate®* and *E-Z Mate®* Mark II couplers, just remove the coupler pocket cover, drop in the coupler, and replace the cover. Operation is simple as well. *E-Z Mate®* and *E-Z Mate®* Mark II couplers operate with a standard metal “glad hand” and under-track magnet, and they are completely compatible with all magnetically operated knuckle couplers currently on the market. (Our under-track magnet comes with a trackside brakeman figure to indicate the magnet’s position.) Coupling, uncoupling, and other yard operations are all performed with ease.

O SCALE PLASTICVILLE® U.S.A. BUILT-UPS

Since 1947, hobbyists and collectors have made *Plasticville® U.S.A.* products their structures of choice. Now, in addition to our traditional, easy-to-assemble kits, Bachmann is pleased to offer these pre-assembled *Plasticville® U.S.A.* buildings. *Plasticville®* pieces add character and dimension to your O scale layout. Many buildings and accessories have been added to the *Plasticville®* line throughout its history, and many are still produced from their original molds. As a fun challenge to collectors, you can collect hundreds of product, color, and packaging variations that have occurred over the years (you can even join the independent Plasticville Collectors Association at plasticvilleusa.org). Whether you're new in town or an established civic leader, Bachmann builds *Plasticville® U.S.A.* for you. City growth is limited only by your imagination!

Mountaineer

Item No. 90048 • Suggested price: \$500.00

Beginning construction in the mountains of post–Civil War Tennessee, the East Tennessee and Western North Carolina Railroad Company was known locally as the “Eat Taters and Wear No Clothes” railroad. Narrow gauge operations began in 1881, and after nearly 60 years of operation, developing interstate highway systems and the torrential rains of 1940 worked to bring about the railroad’s demise. Following a series of purchases and acquisitions (singing cowboy Gene Autry once owned an ET&WNC

locomotive), the railroad was resurrected in 1956, going on to become one of North Carolina’s favorite travel attractions. Our *Mountaineer* passenger set comes complete with a 4-6-0 steam locomotive (with operating headlight, smoke, and speed-synchronized sound), coal tender, coach with lighted interior, and observation car with lighted interior. The set also includes an 8'2" x 4'3" oval of track (20 pieces), power pack and speed controller, illustrated “Bach-Man” instruction manual, and DVD-format video instructions.

Silverado

Item No. 90050 • Suggested price: \$500.00

In the years following the Civil War, the wild west offered hope to a recovering nation. The Comstock Lode promised much-needed wealth to help fund the reconstruction of the Union, but a railroad was needed to carry passengers and freight from remote silver mines to the boomtowns that sprang up around them. The Virginia & Truckee Railroad Company answered the call with trains like our *Silverado*. This ready-to-run electric train set comes complete with a 4-6-0 steam locomotive (with operating headlight, smoke, and speed-synchronized sound), tender with wood load, combine with operating door and lighted interior, observation car with lighted interior and drumhead, 8'2" x 4'3" oval of track (20 pieces), power pack and speed controller, illustrated instruction manual, and DVD-format video instructions.

THIS SET IS READY TO RUN AND PROTECTED BY BACHMANN'S EXCLUSIVE LIFETIME LIMITED WARRANTY.

Note: Sound system and passenger car lights (if applicable) require one 9V battery each for operation. Batteries are not included.

around the world. Now in its 25th year of service and with more than 1 million sold, the 4-6-0 is the backbone of our Large Scale line, providing motive power to Bachmann *Big Haulers*® sets. Nicknamed the "Annie" by posters on the "Ask the Bach-Man" message board at www.bachmanntrains.com, this improved anniversary edition of the 4-6-0 Steam Locomotive boasts new metal gears and an updated lead truck. Combining these new features with metal siderods, separate piping, and all metal handrails, this 4-6-0 is a locomotive that Mr. Baldwin & Company would be proud to call their own.

Break the Silence on Your Railroad

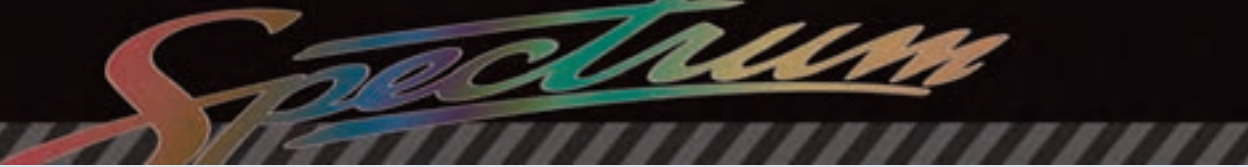

Bachmann Trains offers an extensive line of DCC Sound-equipped *Spectrum*® locomotives. Working closely with SoundTraxx®, we're pleased to offer HO, On30, and Large Scale engines equipped with Tsunami® sound technology. Using sounds taken from real locomotives, modelers can add a new level of realism to their railroads with a broad palette of prototypical sound effects and DCC functions. Plus, the dual-mode decoders work on both DC and DCC layouts automatically. So break the silence on your railroad. See the product guide on the following page for the key to our SOUND ON BOARD® locomotives.

Tsunami

Decoder features include:

- authentic sound effects uniquely appropriate to each model including whistles, bells, chuffs, and air pumps
- additional sounds include dynamo, injectors, coupler clank, water stop, and more
- three whistles to choose from in each model
- whistle can be played in real time to create authentic whistle signals
- high-quality 16-bit digital sound
- advanced motor control features including Load Compensation and Silent Drive to provide smooth, quiet operation
- supports all recognized programming methods

Since the introduction of our first *Spectrum*® locomotive in 1988, Bachmann has expanded the *Spectrum*® line to include motive power and rolling stock from many eras in N, HO, On30, and Large Scale. As always, the *Spectrum*® philosophy is to produce the highest-quality products at an affordable price. As we expand and vary the *Spectrum*® line, our models continue to change in order to feature the latest model railroading technology. Bachmann currently produces locomotives that are DCC ready, DCC equipped, and DCC sound equipped.

Our DCC ON BOARD® motive power features dual-mode NMRA-compliant decoders for control of speed, direction and lighting. DCC SOUND ON BOARD® motive power incorporates Soundtraxx® Tsunami® technology with a 16-bit processor that contains a unique suite of sounds including whistles, bells, chuffs, and much more. In 2013, we are introducing a new Sound-Ready DCC equipped locomotive, the On30 2-4-4-2, with plug-and-play sound capability. It joins our two other Sound-Ready locomotives, the HO *EM-1* 2-8-8-4 and On30 *Stearns-Heisler*. You can add full 16-bit Tsunami® SoundTraxx® sound to these models with the purchase of the companion 2-4-4-2, *EM-1*, or *Stearns-Heisler Sound Module*.

To help you distinguish among the various types of *Spectrum*® products, we have included color-coded sidebars in this section of the catalog. Below is a list of the product categories and their corresponding color codes.

B&O EM-1 2-8-8-4 (Sound Ready)

Performs best on 22" radius curves or greater.

Suggested price: \$475.00 each

Built after World War II restrictions put a limit on new diesel locomotives, the EM-1 was the last steam locomotive class used by the B&O Railroad. This simple articulated engine provided tremendous power at high speeds, making it an ideal hauler of heavy loads through the mountains of West Virginia. The B&O president, Roy B. White, was so impressed after viewing the first one that he exclaimed, "Well, I must say, they have everything!" Bachmann follows in this tradition by presenting a feature-rich DCC-equipped B&O EM-1 2-8-8-4 model, ready for the addition of 16-bit Tsunami® plug-and-play prototypical sound. (Separate-sale Item No. 44951, EM-1 Plug-and-Play Sound Module, required for sound-on-board performance)

Features include:

- DCC-equipped for speed, direction, and lighting
- sound ready with factory-installed speaker

Baldwin Modern 4-4-0 (Sound Equipped)

Performs best on 15" radius curves or greater.

Bachmann has taken the modern 4-4-0 to the next level with features such as an NMRA-compliant 8-pin decoder and Soundtraxx® Tsunami® sound technology that lets you enjoy every authentic whistle, bell, chuff, clang, and more in realistic high-quality 16-bit sound.

Features include:

Peter Witt Streetcar

Performs best on 15" radius curves or greater.

Suggested price: \$180.00 each

While serving as Cleveland's Street Railway Commissioner, Peter Witt designed an all-steel, single-operator streetcar that distinguished itself from others of the era by its use of the center door as an exit only. Passengers could pay the waiting motorman as they boarded at the front and exit at the center of the car, an arrangement that reduced stop times, improved schedules, and increased efficiency. Though designed originally for Cleveland, the *Peter Witt Streetcar* went on to service in cities throughout the world from the 1930s until the early 1960s.

Features include:

- DCC-equipped for speed, direction, and lighting
- dual-mode NMRA-compliant decoder with 8-pin plug for DCC or DC operation
- two-position switch (underside of car) for choice of overhead wire or track pickup
- all-wheel drive
- precision motor with two flywheels
- hidden drive train and electronics
- room for speaker
- die-cast frame and interior

380-Ton Schnabel Transformer Car (North American Style)

Performs best on 22" radius curves or greater.

Suggested price: \$285.00 each

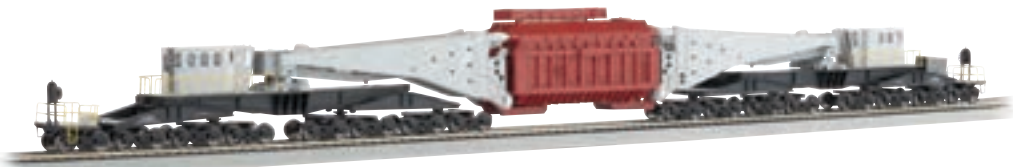

The Schnabel car's unique design allows it to carry extremely heavy or oversized loads, such as generators and transformers for power stations, by making the load an element of the car. The two tapered lifting arms that hold the load resemble a bird's beak, which gave the car its name—*Schnabel* is from the German for "carrying-beak-wagon" (*Tragschnabelwagen*). Schnabel is a funny name for a seriously powerful freight car.

Baldwin Forney 2-4-4 Steam Locomotive

Performs best on 18" radius curves or greater.

Suggested price: \$330.00 each

Following stints with several prominent railroads and locomotive manufacturers, Matthias N. Forney went to work for the Illinois Central Railroad in 1861, where he designed and patented the first of the "Forney" type locomotives. Characterized by a trailing truck positioned under the coal bunker/water tank, Forney designs integrated the locomotive and fuel bunker on one frame, allowing for smooth operation in tight curves. Ideal for fast-paced railroad operation, Forneys were produced by many locomotive manufacturers to serve urban elevated railroads and narrow gauge short lines during the middle to late steam era. Two examples are our *Baldwin Forney 2-4-4*, offered in inside and outside frame versions.

Features include:

- DCC-equipped for speed, direction, and lighting
- dual-mode NMRA-compliant decoder for DCC or DC operation

1:20.3 Baldwin 2-6-6-2 Articulated Saddle Tank Locomotive

Performs best on 8' diameter curves or greater.

Suggested price: \$1425.00 each

The 1920s marked the end of a logging push in the northwestern United States, where lumber companies needed more powerful engines to efficiently handle greater load capacities and quicker turnaround times demanded by the ever-increasing distances from the logging camps to the sawmills. In 1928, Biles Coleman Lumber Company approached the Baldwin Locomotive Works with a request for a narrow gauge 2-6-6-2 capable of handling operations on a recently developed twenty mile logging line. Baldwin responded with a scaled down version of an existing standard gauge design, which was promptly approved by Biles Coleman. Unfortunately, the Great Depression intervened and Biles-Coleman never placed an order with Baldwin. After more than 80 years, we're finishing the job with this exquisite model.

Features include:

- nonproprietary plug-and-play electronics interface to accommodate the control system of your choice, including DC, NMRA DCC, and radio control/battery operation
- two custom wound motors with flywheels
- two idler gear boxes
- prototypical equalized chassis under both power assemblies
- all-wheel driver pickup
- die-cast scale knuckle couplers, front and rear
- constant lighting of LED headlight, cab light, and rear light
- easy access to four switches in boiler to choose track or battery power pickup, operation according to NMRA or large scale model railroading practices, motor power on/off with or without lights, and center "off" position for DCC or DC operation of cab light and firebox flicker
- switch behind smokebox door with center "off" position for DCC or DC operation of smoke unit
- die-cast offset shank couplers also included for use with other popular brands of narrow gauge couplers

1:20.3 Baldwin 2-4-4 Forney Locomotive

Performs best on 8' diameter curves or greater.

Suggested price: \$1250.00 each

Matthias Forney's locomotive was designed to power elevated and surface commuter railroads in America's rapidly growing cities. It was very successful in this role but its success seemed short-lived due to the electrification of these rail lines. The unique design of Forney's locomotive enabled it to live on and made it an ideal form of motive power on railroads hauling stone in quarries, pulling log trains, and harvesting rubber on plantations as far away as Brazil. Bachmann continues this tradition by bringing you a revolutionary design from the past and updating it with exciting new engineering features from the present.

Features include:

Along with the financial devastation of the Great Depression, the Rio Grande Southern faced natural disaster as well when a mudslide cut the railroad into two pieces.
